

System requirements

Hardware

NetPBX hardware requirements are very modest. This is a minimum specification of PC that we would recommend:

- 2 GHz Dual-Core x86/x86-64 CPU
- 1 GB memory
- 40 GB hard disk
- Ethernet TCP/IP network
- Serial RS232-C where required by PBX

Software

NetPBX can be installed on any PC running a Windows operating system later than Windows 7.

A web browser is required to operate the software and, whilst any standards-compliant browser should be compatible, we have extensively tested the following ones:

- Microsoft Edge
- Google Chrome
- Mozilla Firefox
- Apple Safari
- Opera
